Jawad Ahmad

Full Stack Developer | MERN Stack | AI Integration & Automation

Lahore, Pakistan | +92 303 7741461 | jawadahmad5618@gmail.com

Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven BS Computer Science graduate from IUB (2026) with hands-on experience in full-stack web development (MERN), AI integration, and workflow automation. Built TripFusion — a production-ready AI-powered travel platform — solo from architecture to deployment. Founded Zalvro, an AI automation agency building RAG chatbots and lead-generation systems for clients. Seeking a software house to contribute, learn, and grow within a professional team.

PROJECTS

TripFusion — Final Year Project | *React 19, Node.js, Express 5, MongoDB, Redis, Socket.IO, Gemini AI, Amadeus API* ↗ Live

AI-powered travel agency platform built solo — from architecture to deployment.

- Integrated Google Gemini AI to generate personalized itineraries using real-time Amadeus flight, hotel, and POI data
- Built role-based dashboards (admin/user) with booking management, analytics charts, and package controls
- Implemented Google OAuth 2.0 + JWT authentication with account merging and secure session management
- Architected Redis/Upstash caching layer and rate limiting middleware, significantly reducing API load
- Developed real-time customer support chat using Socket.IO with Redis-backed pub/sub for scalability
- Engineered transactional email system (Brevo) for booking confirmations, cancellations, and password resets

Hisab Kitab — Personal Finance Tracker | *Next.js, TypeScript, MongoDB, NextAuth.js, Tailwind CSS, Groq AI, Brevo* ↗ Live

Full-stack personal finance tracker for paycheck-to-paycheck budgeting, built solo end-to-end.

- Implemented secure authentication with NextAuth.js (Credentials + Google OAuth) and a live-updating dashboard with category-wise Recharts visualizations
- Integrated the WhatsApp Meta API, letting users update the dashboard by sending a voice note
- Built a unified transactions system with month-based filtering, weekly grouping, and full CRUD (edit/delete) support
- Engineered an AI-generated month-end email report using Groq (Llama 3.3) for narrative summaries, delivered via Brevo
- Added per-month PDF statement export (jsPDF) and full CSV data export for offline record-keeping

Zalvro — AI Automation Agency | *n8n, Groq (Llama 3.3), RAG, Qdrant (Vector DB), Apify, Google Sheets, Slack* ↗ Visit

Founded and built an AI automation agency delivering RAG chatbots and lead-generation systems for clients.

- Built a RAG-powered chatbot with a Qdrant vector database, serving as an AI knowledge assistant on the agency website
- Automated B2B lead generation via n8n: scraping, dedup, outreach, and reply tracking with Slack alerts
- Designed and built the agency's client-facing website and product offerings end-to-end

Rolex — 3D Interactive Showcase | *React, Three.js, GSAP, Tailwind CSS* ↗ Live

- Built immersive luxury product showcase with 3D animations using Three.js and GSAP scroll-based interactions
- Demonstrates advanced frontend animation skills and performance optimization for 3D web content

TECHNICAL SKILLS

Frontend: React 19, Next.js, Vite, Tailwind CSS, Framer Motion, GSAP, Three.js, Redux Toolkit, React Router, Recharts
Backend: Node.js, Express.js, NextAuth.js, REST APIs, Socket.IO, JWT, Google OAuth 2.0, Bcrypt
Databases: MongoDB (Mongoose), Redis / Upstash, Database Indexing & Pagination
AI & Automation: Gemini AI, Groq (Llama 3.3), LangChain, RAG, Qdrant, n8n Workflows, Prompt Engineering
Cloud & Tools: Cloudinary, Brevo, Amadeus API, Apify, Vercel, Git, GitHub, Postman, Docker (Basic)
Languages: JavaScript (ES6+), TypeScript, Python (Basic), SQL (Basic)

EDUCATION

BS Computer Science — The Islamia University of Bahawalpur 2022 – 2026

CGPA: 3.36 / 4.0
